Students enrolled in the College of Public and Community Service receive competencies. Please refer to the separate enclosed key for instructions on reading a transcript for these students.

Boston State College was closed by action of the Massachusetts State Legislature effective January 24, 1982. The University of Massachusetts/Boston became the certifying agent for course work taken at Boston State College. Transcripts issued by the Office of Registration and Records at the University of Massachusetts/Boston for all students enrolled at Boston State College prior to it closing will carry the heading of Boston State College. Transcripts for students who were enrolled at the University of Massachusetts/Boston as a result of this merger will have a record that reflects work taken at both institutions. Some of the students will still have transcripts that carry the seal of the University of Massachusetts/Boston and the signature of the Registrar and are considered to be an official transcript for that student.
